

Emissions of hydrogen sulphide and carbon dioxide per energy unit from Hellisheiði and Nesjavellir power plants

Emissions of hydrogen sulphide (H₂S) per energy unit from Hellisheiði Power Plant 2007 – 2017 and from Nesjavellir Power Plant 1999 – 2017. There are substantial differences in emissions from the power plants, which can be attributed to, among other things, variable gas quantities and concentrations between fields and years.

Emissions of CO₂ per energy unit

Emissions of H₂S per energy unit
