

Volume of geothermal water from the Nesjavellir Geothermal Power Plant by release route

Geothermal water (thous.m³/year) from Nesjavellir Power Plant 2013-2017 by release route. Differences in the release of heated groundwater in 2015 and 2016 is due to it being reinjected into wells in Mosfellsheidi and in Kýrdalur.

Volumes are rounded to thousands of tons.

	2013	2014	2015	2016	2017
Injection wells	7.730	7.317	7.388	9.917	8.395
Surface	7.824	8.367	9.545	5.504	7.649
Total geothermal water	15.554	15.684	16.933	15.421	16.044
Heated groundwater	26.687	29.333	26.371	24.009	23.760
